

Allowable Subject Matter

1. In view of amended claims filed on 11/22/2011 and further search, Claims 1-9 are allowed over prior art.

The following is a statement of reasons for the indication of allowable subject matter:

It's interpreted, the prior art of record either singularly or in proper combination fails to teach a mobile terminal with a plurality of transceiver interfaces; a communication interface selecting section which selects a communication transceiver interface via which the mobile communication terminal transmits data, from the plurality of transceiver interfaces; a terminal identification address assigning section, a communication interface identification address assigning section and a transmitting section.

Fyfe et al. (US5428666) and Raviv (US20020164983) and Inoue et al. (US6442616) in combination discloses plurality of Number Assignment Modules(NAMs) that interface with communication interfaces, and address control when managing data processed through internal and external networks.

However, the cited references fail to teach the claimed limitations a mobile terminal with a plurality of transceiver interfaces; a communication interface selecting section which selects a communication transceiver interface via which the mobile communication terminal transmits data, from the plurality of transceiver interfaces; a terminal identification address assigning section, a communication interface identification address assigning section and a transmitting section. Therefore, the prior

Art Unit: 2617

art of record singularly or in combination fails to teach the above claimed limitations for claims 1, 3, 4 and 6-8 is therefore the reason for allowance. All dependent claims are therefore allowed under same reasons set forth above.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure and listed on form PTO-892.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOSEPH DEAN, JR whose telephone number is (571)270-7116. The examiner can normally be reached on Monday through Friday 7:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dwayne Bost can be reached on 571-272-7023. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
